Subject Index

air-cast membranes, 267
axial ligand, 233

biliquid, 35
biofouling, 199
bovine serum albumin, 245
brine concentration, 131

ceramic membranes, 297
CFC/H_2S-adsorption, 107
cleaning, 199
combustion, 159
concentration polarization, 171
conducting polymers, 23
counterions, 47
crossflow microfilter, 57
crossflow microfiltration, 191
crosslinking, 139

deposit analysis, 71
desalination, 1
diesel engines, 159
diffusion, 297
dissolved oxygen, 99

economics, 79
economy, 107
electron microscopy, 281
ethene, 149

facilitated transport, 233
flue gas desulphurization, 191
foods, 181
fouling, 71, 181
fouling characterization, 245

gas permeation, 107, 233
gas separating membranes, 159
gas separation, 139, 281, 297

heavy metals, 191
hollow fiber membrane, 119
hydrophilic, 191
hydrophobic, 191
hydrophobic membranes, 181

inorganic membranes, 281

landfill gas, 107
latex membrane, 257
layer permeability, 199
layer redispersion, 199

mass transfer, 131
membrane aging, 257
membrane cleaning, 71
membrane formation, 267
membrane preparation and structure, 23, 47, 257, 281
membrane separation bioreactor, 119
microfiltration, 267
microporous and porous membranes, 35, 267
microporous membranes, 99
module performance, 171
molecular weight cut-off, 35

Nafion, 149

oily waste water, 71
osmotic distillation, 181
oxygen enrichment, 159

palladium, 149
particulate emissions, 159
percolation, 281
permasep B10, 1
permeability, 139
permeators performance, 1
permporometry, 35
pervaporation, 131, 257
pilot scale studies, 131
plant design, 297
polyimides, 139
polymeric complexed membrane, 233
polypyrrole membranes, 47
pore characterization, 35
porous support, 171
precoating, 57
pressure drop, 79

respiratory quinone, 119
reverse osmosis, 1

separation of CO_2/CH_4, 107
spacers, 79
streaming potential, 245
styrene–butadiene–styrene triblock copolymer, 233
supported catalysts, 149
suspended solids, 191

temperature effect, 119

1994 Elsevier Science B.V.

theory, 79
thermoporometry, 35
tubular filter press, 57

ultrafiltration, 35, 71, 79
ultrafiltration membranes, 245
ultrapure water, 99
UV-irradiation, 139

wastewater, 191
wastewater treatment, 119
water purification, 57

zeta potential, 245
